Education

University of California, Santa Cruz

Bachelor of Science in Computer Engineering

Expected Graduation: Dec 2024

Santa Cruz, CA

Technical Skills

Languages: Python, HTML, CSS, Javascript, Typescript, SQL, C

Developer Tools: Docker, Swagger UI, Postman, Figma, Expo, Visual Studio Code, Pinecone, PostgreSQL, Firebase

Technologies/Frameworks: Next.js, React.js, Tailwind CSS, Node.js, Express.js, Flask, Material UI, Bootstrap, Jest, Vitest, React Testing Library, Mock Service Worker, React Native

Experience

Headstarter AI

Jul 2024 – Sep 2024

Software Engineer Fellow

San Francisco, CA

- Built and deployed 5 AI projects in 5 weeks using **React.js**, **Next.js**, **Tailwind CSS**, **Firebase**, and **Vercel**, following **agile methodologies** with weekly sprints and incorporated **CI/CD** practices for iterative deployment.
- Developed a **mobile and web application** for a tutoring center, designed to support **100+ elementary school students**, incorporating lessons, quizzes, and real-time progress tracking, along with admin views for monitoring student performance.

UC Santa Cruz, Police Department

Jan 2024 – Jun 2024

Full Stack Developer Intern

Santa Cruz, CA

- Prototyped an **RFID-based inventory management system** with comprehensive views, automated history tracking, and an interactive dashboard for location-based scanning and auditing, reducing equipment discrepancies by **50%**.
- Improved auditing efficiency by **86%**, decreasing audit time from **7 days to 1 day**, through automated tracking and scanning features.
- Enhanced user experience by leveraging **React.js** and **Material-UI** for frontend development and built robust **RESTful APIs** with **Express.js**, **Node.js**, **OpenAPI**, **Docker**, and **PostgreSQL**, increasing user satisfaction to 100%.
- Achieved **100% code coverage** on frontend and backend using **Vitest**, **React Testing Library**, **Mock Service Worker**, **Jest**, and **Supertest**, ensuring comprehensive and reliable testing.

UCSC Slug Gaming

Jun 2024 – Jun 2024

Web Developer

Santa Cruz, CA

- Launched a **responsive** informational website using **React** and **Tailwind CSS**, implementing strategies that reduced operational overhead and enhanced process efficiency making data input **50% faster**.
- Increased site traffic by **1000%** after deployment, significantly boosting visitor engagement.
- Improved and updated the website based on user surveys and feedback, improving user experience and increasing **return visits by 30%**.

Opportunities for All — Google

Jul 2022 – Aug 2022

CSI Tech Intern

San Francisco, CA

- Successfully raised awareness about littering issues in San Francisco by creating a website that attracted **1,000+ unique visitors**, leading to increased public engagement and community interest in environmental actions.
- Attained valuable industry insights by engaging in **10+ cross-functional meetings** with Google employees from various departments, resulting in enhanced understanding and strategic perspectives on the tech industry.

Projects

AI Customer Support Chatbot | *Next.js, React.js, Tailwind CSS, OpenAI, LangChain, Pinecone*

Aug 2024

- Launched an AI-powered chatbot capable of handling diverse customer support scenarios with **context-aware responses**.
- Integrated **Retrieval-Augmented Generation (RAG)** to enhance responses by incorporating relevant external content, improving accuracy and user satisfaction.

Pantry Management Application | *Next.js, React.js, Material-UI, Firebase, OpenAI*

Jul 2024

- Deployed a pantry management application that allows users to track 100+ ingredients and generate AI-driven recipes.
- Implemented data analytics to offer insights on ingredient usage, improving efficiency and minimizing food waste.

Environmental Impact Assessment Tool | *React.js, Tailwind CSS, Flask, Firebase, OpenAI*

Jan 2024

- Led a full-stack development project at **CruzHacks**, competing against **300+ participants**, and received recognition for innovation and impact.
- Created a tool designed for assessing the environmental impact of products on Amazon, using **Beautiful Soup** for data scraping and AI-powered insights to evaluate product sustainability.
