

Education

University of California, Santa Cruz

June 2024

Bachelor of Science in Computer Engineering

Santa Cruz, CA

Coursework: Full Stack Development, Software Engineering, Web Development, Database Systems, Principles of Computer Systems Design, Data Structures and Algorithms, Object Oriented Programming

Technical Skills

Frontend: React.js, React Native, Next.js, Tailwind CSS, Material UI, Bootstrap, HTML, CSS, JavaScript, TypeScript, Vitest, React Testing Library, Mock Service Worker

Backend: Node.js, Express.js, Flask, PostgreSQL, Firebase, Pinecone, Python, SQL, C, Jest, Supertest

Developer Tools: Docker, Swagger UI, Postman, Figma, Git

Experience

Front End Software Engineer (Freelance)

Oct 2024 – Present

Sigmith Multiservices

Remote

- Developed a web application using Next.js and Tailwind CSS, integrating 20+ reusable components to simplify development and support scalability.
- Designed a 15+ page Figma template to streamline design-to-development handoff and enhance team collaboration.
- Incorporated design feedback from 100+ students during weekly demos, iteratively refining the application to enhance usability and user satisfaction.

Software Engineer Fellow

Jul 2024 – Sep 2024

Headstarter AI

San Francisco, CA

- Built and deployed 5 AI projects in 5 weeks using React.js, Next.js, Tailwind CSS, Firebase, and Vercel, following agile methodologies with weekly sprints and incorporated CI/CD practices for iterative deployment.
- Led 4+ engineering fellows in developing projects from design to deployment using MVC design patterns.

Software Engineer Intern

Jan 2024 – Jun 2024

UC Santa Cruz, Police Department

Santa Cruz, CA

- Prototyped an RFID-based inventory management system with comprehensive views, automated history tracking, and an interactive dashboard for location-based scanning and auditing, reducing equipment discrepancies by 50%.
- Redesigned auditing tools using React.js, Material-UI, and RESTful APIs (Express.js, Node.js, PostgreSQL), reducing audit time from 3 days to 1 day and improving efficiency by 67%.
- Achieved 100% code coverage across all frontend and backend components, including statements, branches, functions, and lines, using Jest, Vitest, React Testing Library, Supertest, and Mock Service Worker.

Front End Software Engineer

Jun 2023 – Jun 2024

UCSC Slug Gaming

Santa Cruz, CA

- Implemented a responsive informational website using React and Tailwind CSS, leveraging JSON files to dynamically populate data and reduce data input time by 50%.
- Revitalized the club website based on user feedback, boosting engagement, increasing return visits by 30%, and growing active users to 200+ within six months.

Projects

Healora | *Next.js, Tailwind CSS, Shadcn, Hume AI, Figma*

Oct 2024

- Developed an AI-powered healthcare platform with an empathetic virtual assistant, and won the Hume AI: Best Use of Emotionally Intelligent Voice AI award at CalHacks 11.0 among 2,000+ participants.
- Implemented a clear and accessible interface, enabling healthcare professionals to quickly access critical patient data and make faster diagnoses, which reduced patient wait times by 35%.

EcoScan | *React.js, Tailwind CSS, Flask, Firebase, OpenAI*

Jan 2024

- Engineered an award-winning environmental impact assessment tool in under 36 hours at CruzHacks, recognized for innovation among 300+ participants; led full-stack development to promote sustainable choices.
- Created sustainability analyzer by scraping Amazon data and evaluating products with AI insights; provided detailed environmental assessments to encourage eco-friendly purchasing decisions.
